HIGH STRENGTH Aluminum Alloys

Aluminum in every Commercial Form

The ZR-1 (Shenandoah) is made of strong aluminum alloy which we furnished. The same alloy is available in our various products, where high strength and high elongation are desired. Let us show you how you can save by using high strength aluminum.

We produce aluminum in every form; we can recommend the best form (castings, for instance,—either sand, die or permanent mold) without prejudice, since we make all forms. Also, we have developed special alloys for special uses, to an extent possible only with diversified production.

OIL-*of*-SALT

ANTISEPTIC—GERMICIDE

FIRST AID TO THE INJURED

A marvel in the treatment of BURNS, CUTS, BRUISES, etc. It is NON-IRRITATING and FOOLPROOF.

First Aid Cabinets are not complete that do not contain a bottle of Mosso's OIL-OF-SALT. Always ready for immediate use.

C. A. Mosso Laboratories Inc.

214 South Leavitt Street Chicago, Illinois

OIL-OF-SALT is used with positive results by government, city and fire department officials, and by hospital authorities in the general manufacturing and transportation fields.

You Need It

RELIEVES PAIN
PREVENTS INFECTION
CHECKS BLOOD FLOW
SAVES LABOR
SAVES TIME
SAVES MONEY

A request on your letterhead will bring a sample bottle free.

MOSSO C. A. LABORATORIES, INC. (Forty years ago we introduced OIL-OF-SALT to a few manufacturers. They used it, liked it, and bought more. Other manufacturers heard of it and likewise provided it for their factories. And so it grew in reputation. Today its use has spread to thousands of the largest manufacturers in the world, any of whom will testify to its merit as a practical, effective "First Aid" dressing. OIL-OF-SALT is harmless and non-irritating, yet offers every "First Aid" requirement in one bottle.) 214 S. Leavitt st., Chicago, Ill.

MAGNOLIA ANTI-FRICTION METAL

Lowest frictional coefficient by U. S. and French Government tests

Runs cool with little lubricant and is well adapted to extraordinary speeds and loads. Melts and pours well, and is easily pressed and scraped in. Sold in ingots and cored bars, the latter for avoiding pattern and casting costs on small bearings.

We also make bearing metals to other standard formulas and will make specials to order. Write for quotation.

BAKELITE

In diversity of applications, and in variety of form, Bakelite is unique among electrical insulating materials.

BAKELITE MOLDING MATERIAL readily lends itself to the making of insulation parts or devices, whether these be simple or intricate in design, and permits the firm embedding of metal inserts during the molding operations. The part is completely formed in the mold and requires no further machining or finishing.

LAMINATED BAKELITE—in sheets, tubes and rods—may be machined, sawed or drilled, and is used for innumerable electrical and mechanical purposes. It is standard material for radio panels.

BAKELITE VARNISH is extensively used for impregnating the largest as well as the smallest armature coils.

BAKELITE CEMENT is used for joining porcelain insulators, lightning arrestors, and in many other technical applications.

The several forms of this material are sold under the trade mark **BAKELITE.** It is notable for high dielectric and mechanical strength, chemical inertness, and resistance to heat, oil, acids and moisture. These properties are permanent and do not deteriorate with age.

The co-operation of our Engineering Department is at the service of manufacturers in working out new applications of "The Material of a Thousand Uses."

BAKELITE Condensite REDMANOL are the registered Trade Marks for the Phenol Resin Products manufactured under patents owned by BAKELITE CORPORATION

Specifications:

	SB55	SB33
Capacity	55 gal.	33 gal.
Gauge	No. 13	No. 14
Weight—Black	92	63
—Galvanized	100	68
I.C.C. Specifications	5 & 5A	5 & 5A
Rolling Hoops	None	None
Longitudinal Seam	None	None

These barrels are a one-man package, easy to handle and up end because of their bilge shape and the pressed steel chime permits a firm hold.

Raised openings, exclusive with Hackney Containers prevent water draining into the barrel. The body of the barrel is formed in successive drawing operations from a circular sheet of steel, resulting in a package entirely seamless up to the head. Heads and openings are brass dip brazed, proof against leaks or rust.

Hackney Two-Piece Barrels are of entirely seamless construction except for a transverse weld in the bilge.

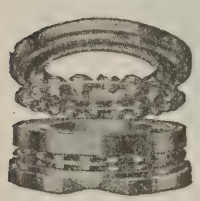
An Organization Built for Precision.

Scientific in Principle and Practice.

Double-row, maximum type, radial bearing, 1200-N, 1300-N, 1400-N Series.

Double-row, deep-groove, standard type, radial bearing, 1200, 1300, 1400 Series.

STROM ball bearings are made of chrome alloy ball bearing steel, specially heat-treated to insure strength, hardness, density, and elasticity; all types and sizes of radial (single and double row), thrust and angular contact; designed to operate under heavy loads and high speeds, and may be confidently accepted as incorporating every quality essential in a high-grade bearing.



They are made to standard dimensions and as perfectly adapted for replacement as for new work—

JACKSON'S Patent BELT FASTENERS

Jackson Belt Fasteners will positively not pull loose,

Are permanent and can be used over and over again,

Can be readily "taken up" if Belts become "slack,"

Know more about the Jackson Belt Fastener and you will find costly delays entailed by the use of rawhide lace and other methods will be entirely dispensed with,

Sell themselves owing to their practical simplicity,

Our Jackson Fasteners are used in every country in the world and in every kind of industry,

No Fastener will hold a Belt as securely and safely as the Jackson.

None genuine unless bearing name "Jackson" or "I. J. Belt Fastener Co."

MORSE
SILENT CHAIN DRIVES
Used in all industries for transmitting power from ¼ to 5000 H.P. Chain speeds up to 1200 to 1600 ft. per min., sprocket speeds from 250 to 6000 R.P.M. Sprocket centers any reasonable distance, —usually from 12 to 120 in. Advantages are positive speed ratio, 98.6% to 99% constant efficiency, quiet operation at all speeds, any convenient distance between sprocket centers, little lubrication at infrequent intervals, unaffected by heat, cold, or moisture, long life, low up-keep cost.

Fabreeka Belting

A PRODUCT THAT HAS MADE A LEGION OF FRIENDS—THROUGH THE SHEER MERIT OF ITS PERFORMANCE

Water-proof, Weather-proof, Steam-proof, Acid-resistant, Pliable, Strong, True-running, Dense fibre, Will not shrink, Little stretch, Great Puller.

Its continued use in all industries—by the biggest corporations—to replace all other types of belting—is a well known fact

Put Fabreeka on Your List of Belt Houses to Figure on Your Next Belting Requirements for Transmission or Conveyor

Fabreeka Belting for Transmission

Transmits maximum power without slippage.

Is very pliable and remains so.

Under normal working conditions will stretch less than any other belt.

Has enormous tensile strength, in proportion to its thickness, which permits its safe application in lighter weights than other types of belt.

Is unaffected by water, steam or exposure to the elements.

Runs absolutely true on pulleys and without vibration.

Has a density of fiber and compactness of construction unequaled.

Will not shrink under any conditions. We care not what you do. Soak it in boiling water, subject it to live steam, and then expose it to the sun, and you will find it has not shrunk.

Unqualified success and long life in chemical plants, under actual working conditions of acid fumes and gases, is practical proof of its resistance to these conditions.

Unlike any other belt, can be cut down from wide sizes to narrow ones, without waste, injury to material or impairing its true running quality.

Fabreeka Belting is unique in its type of construction. When properly applied, it is a joy to watch its performance.

Fabreeka Belting's Industrial Uses

Automobile Manufacturers: Fabreeka is successful on all types of machinery in this industry, replacing leather belt; also exceptional as automobile fan belt.

Breweries and Bottling Plants: Gives positive pulling power even when running right in water.

Brick Manufacturers: Will stand up longer in grit and dust than any other belt. Makes exceptional off-carrying belt.

Button Manufacturers: Adaptable to all conditions in this industry.

Creameries and Dairies: Standing up in wettest places in these plants.

Cotton Mills: Is sweeping the South for use on spinning frames, looms, and for motor work.

Candy Manufacturers: Fabreeka makes exceptional conveyor in candy plants; also generally used for transmission.

Cottonseed Oil Mills: Giving exceptional service on fans, linters and cake grinders.

Chemical Plants: Stands up longer in acid and acid fumes than other belts.

Cement and Limestone Products: Grit and dust have little effect on Fabreeka; exceptional belt for transmission or conveying.

Can Manufacturers: Fabreeka sweeping this industry.

Celluloid Manufacturers: Wonderful belt for comb saws.

Canneries: Fruit, vegetable and fish canners are doing away with cheaper belts and adopting Fabreeka.

Dye Houses: Fabreeka making new records of service in this industry.

Foundries: General all-around belt, exceptional for use on tumbling barrels and for sand conveyors.

Fertilizer Plants: Resists acid and lasts for years.

Hat Factories: The best belt for sizing room conditions.

Knitting Mills: Exceptional for knitting machines, ribbers and loopers.

Laundries: Best extractor and washing machine belt on the market.

Machine Shops: Exceptional belt for presses, lathes, iron planers, drills and grinders.

Mining: Exceptional as a conveyor.

Paint Manufacturers: Giving wonderful results on paint grinders.

Paper Mills: Best belt yet produced for paper machines, pumps, beaters and Jordan engines.

Packing Plants: Fabreeka now used by the largest packers.

Railroads: Fabreeka standard equipment with several railroad companies.

Silk Mills: Fabreeka exceptional for silk looms.

Steel Plants: Giving wonderful service in several of the largest steel mills.

Tanneries: The best belt for tannery drums and wet machines, also conveyors.

Woodworking: An all-around belt for woodworking. (Not recommended for side heads.)

Fabreeka Belting for Conveyors

Fabreeka construction presents a new conveyor idea, theoretically approved by the biggest conveying engineers, and actually performing wonders in service.

Until Fabreeka arrived, a rubber belt with a reinforced cover was the last word in conveyor belts.

Rubber covered conveyors are becoming obsolete.

Fabreeka construction presents a large multiple number of plies.

Each ply is a separate unit, not related to any other ply.

For conveying purposes, Fabreeka construction presents not one cover—but many covers.

Each ply of Fabreeka belt will stand approximately the same abrasive wear as the rubber cover of a rubber belt.

This explains why Fabreeka conveyors will stand up longer in abrasive wear and outlast any other belt in conveyor service.

Fabreeka is being used successfully for all types of conveyors from the very lightest package types to the heaviest belts for conveying, stone, cement, coal, etc.

Fabreeka belting is made in many weights and thicknesses, to properly take care of all conveyor conditions.

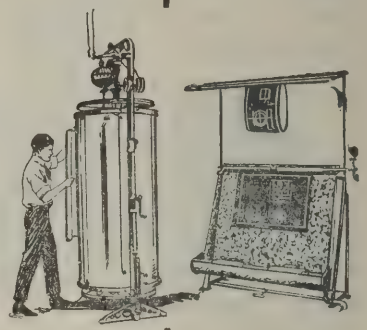
Blue Printing Machines



The Pease Peerless

Automatic and Continuous Blue Printing Equipment turns out prints at one-quarter the cost of ANY other blue printing machine where independent methods of washing and drying are used. Over 1,600 satisfied users—prints, washes and dries in one operation—no wrinkled or distorted prints. Printer can be purchased separately if desired.

The Pease Vertical

Blue Printing Machine and Sheet Washer form an economical method of turning out a steady supply of blue prints whenever you want them. Patented cylindrical oil control, self-adjusting curtain, positive contact and Universal Arc Lamp printing on either direct or alternating current, are special features. Ask for special pamphlet describing the Pease Sheet Dryer (not illustrated).

Sectional Bookcases
For Office and Home

Have many exclusive features worthy of your consideration before purchasing a bookcase of any kind. The patented door guide enables one to easily operate the receding door without sticking or binding. The dust shield prevents dust from settling and door from scraping on top of books. An arrangement of sections can be made to fit most any space and in woods and finishes which will harmonize with present furnishings. Send for bookcase Catalog No. 25 in colors. If interested in office filing equipment and supplies, ask for Catalog 24.

CARY'S UNIVERSAL BOX STRAP

THE STRAP WITH THE "NAME"---THE KIND IT PAYS TO USE

This Strap is made of extra soft annealed steel of great tensile strength through which nails can be driven without first punching holes. The bosses stiffen the edge of the Strap and protect the nail heads when case is moved along the floor.

Made in four widths—½, ⅝, ¾ and ONE INCH.

Put up in coils of 300 feet each, and packed 20 coils in a case.

Every coil is equipped with our patent metal hanger, which makes it a complete reel that can be hung anywhere without floor space being occupied.

We manufacture a complete line of Metal and Wire Box Straps, Box Fasteners, Seals, Clasps, Corrugated Joint Fasteners, etc. Write for Our Catalog

BROWNHOIST

Buckets

Simple but sturdy construction stands out as the greatest advantage of the Brownhoist Clamshell Bucket. Manganese steel digging edges, extra large bearing surfaces (those carrying the load are bronze bushed), straight rope leads (with no S bends) and large sheaves reduce wear on both bucket and ropes.

The four-part closing line, the shape of the bowls, and the relative position of the centers give this bucket great closing power and digging ability.

The Brownhoist Link-Type Grab Bucket is designed for heavy duty work in handling coal, ore, stone, etc. This bucket is built in types ranging from ½ to 15 tons capacity for use on all kinds of two drum machines.

Portable Buildings

FROM A TOOL HOUSE TO AN INDUSTRIAL PLANT

Garage or Tool House

Lyonore Metal

of which these buildings are constructed, is a corrosion resisting alloy that has successfully withstood severe tests under laboratory, factory and atmospheric conditions.

MARYLAND METAL BUILDINGS

are sold on a delivered and erected price that is lower than other forms of permanent construction, or you can erect them with your own labor, under your or our supervison.

Foundry Building Erected for C. H. TURNER Statesville, N. C.

BUILDINGS of any type, for any use, can be had out of stock at a price that is low in first cost, maintenance and depreciation.

MARYLAND METAL BUILDINGS

Are Structural Steel Buildings, covered with Lyonore Metal

The units forming the roof and side walls are made of heavy gauge metal; the corrugations are die formed, with patented, interlocking, weathertight joints, that are not affected by vibration.

This construction is of exceptionally neat appearance, rigid and strong, and permits expansion of your plant while maintaining uniformity of design.

Let us show you how a Maryland Metal Building can be adapted to your needs. Send for catalog RB and prices
